OBJECTIVE

Motivated and detail-oriented engineering student with strong skills in web development and problem-solving. Experienced in building projects using modern technologies and passionate about applying technical knowledge to real-world challenges. Eager to contribute to innovative projects, continuously learn new skills, and grow in a professional environment.

EDUCATION

Bachelor of Engineering in Computer Science

CGPA: 8

Jain College of Engineering and Research, Belagavi

SKILLS

Backend: Java, REST API

Frontend: HTML, CSS, JavaScript, React.js

Database: MySQL, MongoDB

Version Control: Git, GitHub

PROJECTS

1) Placify – Placement Assistance and Company Information Platform

- Developed an all-in-one platform to simplify placement preparation by providing centralized access to company information, eligibility criteria, required skills, CTC details, and historical placement data.
- Enabled smarter career decisions through features like resume uploads, skill-based job matching, and automated job description scraping.
- Built with a secure backend for reliable data management and a React-based frontend for seamless navigation.

2) ConnectHub – Student, Cofounder & Mentor Collaboration Platform

- Designed a collaboration platform linking students, cofounders, and IT mentors to provide career guidance and networking opportunities.
- Implemented ML-based face detection login, AI-powered resume evaluation, and automatic interview question generation for personalized preparation.

INTERNSHIP

Full Stack Web Development

FEB 2025 – Present

Acmegrade

- Completed one-month intensive training; currently pursuing internship focused on full-stack web application development.

CERTIFICATES

1) Full Stack Web Development – Acmegrade, 2025

2) Java Programming – Pranaksh Technologies LLP

3) Embedded C with ESP32-S2 – Delithe, 2025
